

HANDMADE

**MOCCAMASTER**

FOR THE REAL TASTE OF COFFEE

'Life is too short,  
to drink bad coffee'

# Moccamaster, the healthy choice

Filter coffee is gaining in popularity and there is a good reason for this: filter coffee contains the lowest level of cafestol. This coffee ingredient indirectly increases the level of cholesterol, the negative effects of which are well known. In comparison to capsule machines, the benefits for the environment is in favour of filter coffee due to less energy for production and less litter.

For many years Moccamaster has been known for high quality and elegant design. With a wide assortment of modern colours, Moccamaster follows the trend to match your kitchen equipment to your decor.

## The Moccamaster quality aspects

- High quality recycable materials, BPA free
- Handmade in The Netherlands under strict quality control
- Long lasting performance, 5 years warranty
- SCA & ECBC certified
- Solid aluminium housing
- Removable parts easy to clean and easy to be replaced
- UK plug available

Moccamaster consistently brews the most delicious, fresh cups of coffee.

Handmade in the Netherlands

High quality materials, BPA free

9-hole water outlet of stainless steel

Quick brewing (10 cups in 6 min)

Solid aluminium housing

Auto-Off Technique (40 min)

High quality copper heating element

Intelligent hotplate

Various awards

Optimal brewing temperature 92°-96°C

# Over 50 years experience in coffee taste and flavour

Since 1964, Technivorm Moccamaster has manufactured Moccamaster. Worldwide the filter coffee machines have been rated as the best to produce first class coffee with delicate nuances of taste and flavour. The perfect taste, high quality and reliability are our highest priority.

The production of Moccamaster in our factory in the Netherlands is undertaken by a first class dedicated team of experienced and qualified people. Close co-operation and liaison with leading coffee research centres enable a further development of our machines.

## The traditional coffee filter machine

- Perfect brewing temperature of 92° to 96°C: less sour or bitter taste
- The brewing element switches off automatically after brewing
- The hotplate, with dual-heat switch, keeps the coffee at 80°-85°C for 40 minutes
- Brew basket with automatic drip stop
- Jug lid with mixing tube for homogeneous coffee
- Extra fire prevention: brewing element and hot plate work independently
- 1.25 litre (10 cups) within 6 minutes
- 9-hole stainless steel outlet arm for efficient wetting of the coffee grounds

Size H 36 cm, W 32 cm, D 17 cm • Weight 2,8 kg • Power 1,520 W • Cord 135 cm • Coffee filter No. 4

### The traditional filter coffee machine with thermos jug

- Perfect brewing temperature of 92° to 96°C: less sour or bitter taste
- The brewing element switches off automatically after brewing
- Brew basket with automatic drip stop
- 1.25 litre (10 cups) within 6 min.
- 9-hole stainless steel outlet arm for efficient wetting of the coffee grounds
- Two lids: the mixing/brewing lid with mixing tube for homogeneous coffee and a transport lid
- The mixing lid is also suitable to pour the coffee in your mug, no need to turn the lid open.

This machine is suitable for brewing 10 cups of coffee; for smaller quantities, we recommend the KBG with glass jug for maximum heat retention.

Size H 41 cm, W 33 cm, D 17 cm  
Weight 2,9 kg  
Power 1,450 W • Cord 135 cm  
Coffee filter No. 4

# The double machines

These coffee machines are very suitable for small offices, restaurants, hotels, bars, etc. \* Within 6 minutes you serve 20 cups of fresh filter coffee (160 cups or 20 litre per hour).

\* Machines for professional use have a warranty of 2 years.

# Cup-one

in 6 colours

**Moccamaster Cup-one is a recent innovation in the series Moccamaster coffee machines of Technivorm. The pulsating part of the heating element provides an optimal water/coffee contact time.**

- Brewing temperature 92°-96°C and coffee temperature is 80°-85°C
- The ideal temperature for the correct flavour, less bitter or sour taste
- 300 ml coffee in 4 minutes (less ml also possible)
- Automatically shuts off when the water has drained
- Easy to use, silent
- Less litter and therefore better for the environment than other 1-cup-machines

Incl. 2 porcelain mugs,  
measuring spoon, cup holder,  
10 disposable paper cups,  
coffee filters

Weight 2 kg excl. mug  
Power 1,090 W • Cord 135 cm  
Coffee filter No. 1

*The perfect brew,  
just for you!*

# **Fresh ground beans: an absolute must for the sophisticated coffee drinker**

**The fine and homogeneous grinding of Moccamaster grinders ensures the perfect combination with our filter coffee machines.**

- Moccamaster grinders have a smart grinding system and are fast and easy to use with a simple push button.**
- The bean container and the grinding chamber are separate. This prevents heating of the coffee powder by the warmth of the grinding process; no loss of aroma as often produced by conventional grinders.**
- The grinding blades work like a propeller: the ground coffee is blown through a fine-grained sieve of stainless steel so that the coffee grounds do not come into contact with the blades again.**

**The model of grinder you choose mostly depends upon your kitchen conditions: the wall-mounted model keeps the countertop free, whereas a table top can be stored in the cupboard.**

## KM/DOS Coffee Grinder with Dispenser

A perfect combination of grinding and dosing coffee. The ground coffee can be dosed directly into your filter holder: Always an exact dosage without using a measuring spoon and no spillage of coffee powder on your countertop. The ground coffee is not exposed to open air. The dosage unit is easy to operate for right- or left-handers.

Wall mounting with dosage unit

|                |                           |
|----------------|---------------------------|
| Bean container | 400 g coffee beans        |
| Dispenser      | 500 g ground coffee       |
| Power          | 185 W • 15.000 RPM        |
| Sieve          | Fine grind                |
| Size           | H 34 cm, W 18 cm, D 15 cm |
| Weight         | 1.7 kg                    |
| Cord           | 130 cm                    |

## KM4 Coffee Grinder Table Top

This grinder can easily be moved around and or stored in a cupboard if you need more space.
