

ORGANIC SINGLE ESTATE COFFEE

CAFETIÈRE:

Rinse your cafetière with water from a just-boiled kettle to warm the glass.

Put 30g ground coffee into the cafetière and pour over 500ml freshly-boiled filtered water. Stir gently to break up the crust and mix coffee and water.

Leave the cafetière for four minutes to steep.

Put on the lid and slowly depress the plunger.

If you wish to increase coffee strength, increase the amount of coffee in increments of 2g. 32g will give you a discernibly stronger cup. Once you have nailed it, make note of it.
